SAYYED ARBAAB

FRONTEND DEVELOPER

"I've been immersed in programming languages since my undergraduate studies, steadily accumulating skills along the way. Following graduation, I delved into Full Stack Web Development, but my true passion lies in front-end development. With practical experience gained through company projects, I am eager to transition into a front-end web developer role, leveraging my expertise to create engaging web applications."

EXPERIENCE

Frontend Developer   seo service rankstar | 7-2023 - Present

- Proficient in React.js with expertise in Redux state management and RESTful API integration.
- Collaborate with backend developers to ensure smooth communication and data handling.
- Write clean and maintainable code using modern JavaScript ES6+ features.
- Conduct code reviews, leveraging Firebase for CRUD operations and authentication.
- Translate design mockups into visually appealing and interactive web interfaces.
- Stay updated with the latest frontend development trends and technologies

PROJECTS

CRYPTO DASHBOARD/REACT-JS   Live

Developed a responsive Crypto dashboard displaying financial metrics, transactions, and support options.use ReactRoute,Chakra user interface,npm,deploy on netlify,components. Designed for seamless user experience without backend integration, prioritizing frontend interaction.

E-COMMERCE REACT-REDUX FIREBASE   Live

Developed an E-Commerce web app with React, Redux, and Firebase, facilitating user authentication and product management. Utilized Firebase Firestore for real-time data storage, enabling seamless addition and removal of products with instant updates.

NEWS-APP REACT/EXPRESS/FIREBASE   Live

Implemented an Express server for fetching and displaying data, integrated Bootstrap for UI, and utilized Firebase for complete authentication and Firestore for data storage. Incorporated React for routing and deployed the application for seamless access.
